CAREER OBJECTIVE

Aspiring **Data Analyst** and **Software Developer** with skills in Python, data visualization, and problem solving. Eager to apply analytical and programming skills to support data-driven decisions and build efficient software solutions. Committed to continuous learning and professional growth.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Noida Institute of Engineering and Technology, AKTU University

2023 – 2027

Greater Noida, India

- Current CGPA: 8.40 / 10

Senior Secondary (Class XII), Science Stream

Holy Public School, CBSE Board

2021 – 2023

Greater Noida, India

- Percentage: 80%

Secondary (Class X)

Holy Public School, CBSE Board

2020 – 2021

Greater Noida, India

- Percentage: 84%

EXPERIENCE

Python Developer Intern

YBI Foundation

July 2024 – August 2024

Remote

- Created and optimized Python scripts to automate real-world data processing tasks, improving execution efficiency and reducing manual workload.
- Utilized core Python libraries including **Pandas**, **NumPy**, and **Matplotlib** for data analysis, cleaning, and visualization.
- Built automation mini-projects, improving debugging and development skills.
- Processed and analyzed structured datasets to extract insights and support data-driven decision-making.
- Collaborated on coding tasks and practiced version control using **Git**, improving code organization and project workflow.

Data Visualization Intern

Tata Consultancy Services (TCS)

June 2025 – July 2025

Remote

- Designed and developed interactive dashboards and reports using **Power BI**, **Excel**, and **Python**.
- Performed data cleaning, transformation, and statistical analysis to generate actionable insights.
- Improved analytics workflow efficiency and reporting accuracy by 25%.

PROJECTS

Security Incident Detection and Analysis

GitHub Repository

- Tech Stack: Kali Linux, Ubuntu, Nmap, Hydra
- Built a cybersecurity lab to simulate attacks using Nmap and Hydra, and implemented security controls with log analysis to detect intrusions.
- Visualized attack patterns and login attempts through a Python-based dashboard for better incident analysis.

Couple's Money Planner

GitHub Repository

- Tech Stack: Python, Streamlit, SQLite, Plotly
- Built an AI-powered financial planning website with tax, HRA, SIP, and NPS features.
- Designed a dashboard to track savings, net worth, and goals with AI-driven insights.

Railway Database Management System

GitHub Repository

- Tech Stack: MySQL, HTML, CSS
- Designed a relational database system with CRUD operations to manage train schedules, routes, and passenger data.
- Applied normalization and indexing to improve data consistency and query performance.

Amazon Global Sales Dashboard

GitHub Repository

- Tech Stack: Power BI, Excel, DAX
- Created an interactive Power BI dashboard analyzing Amazon global sales trends and KPIs.
- Generated business insights through data visualization and trend analysis.

SKILLS

Soft Skills: Communication | Teamwork | Adaptability | Time Management

Technical Skills: Python | Java | SQL | Data Structures & Algorithms | HTML | CSS | Pandas | Power BI | Excel | Data Analysis | Linux | GitHub

CERTIFICATIONS

- Oracle Cloud Infrastructure Data Science
- AWS Academy Graduate – Cloud Architecting
- Oracle Analytics Cloud Certified Professional
